

SCIENCE TEAM LEADER

Kota Kinabalu, Sabah, Malaysia

OVERVIEW

SEADLING is seeking an experienced research scientist to direct and implement research on tropical macroalgae cultivation. We are looking for a hard-working individual with key leadership and problem-solving abilities who can flourish in a fast paced start up environment.

Fast-track your career by joining a rapidly growing company creating technology for an exciting new sector. Enjoy living on the beautiful island of Borneo with close access to coral reefs, deep jungles and majestic mountains.

We are open to both Malaysian and international candidates, and can arrange the required working permits.

ABOUT SEADLING

We are a seaweed biotechnology company with a mission to accelerate the seaweed sector as a food and environmental solution. Our work is developing first-in-world innovations for tropical seaweed farming and products. SEADLING is a social and environmental impact company, creating opportunities for poor communities while rejuvenating marine ecosystems.

Our R&D facilities are based in Kota Kinabalu, Malaysia and include a laboratory, hatchery and field sites. Expansion of production facilities is planned for Malaysia and Indonesia in 2022 and then across the S.E. Asia region in subsequent years.

RESPONSIBILITIES

- Coordinating research activities and managing a small team of research scientists
- Creating and managing budgets for research activities
- Scaling of prototypes and systems
- Coordinating with contract and collaborative research partners
- Recruiting qualified researchers to join the team

- Preparation of reports and documentation of work performed
- Directing the company's IP strategy
- Participating in and representing the company at conferences and events
- Staying updated on technological advances and industry trends

REQUIREMENTS

- Post graduate degree in biology/aquaculture/agriculture
- Minimum 5 years of industry/academic managerial experience
- Willingness to relocate to Kota Kinabalu, Malaysia
- Research and development management experience
- Project management experience
- Fluency in spoken and written English

PREFERRED

- Experience with macroalgae research and/or industry
- Willingness to learn Malay and Indonesian languages, if not already fluent

SALARY

Remuneration packages ranging from US\$25,000 to US\$ 50,000 depending on international experience, with potential for share options.

STARTING

Q4 2021
